Highly Diverse Solutions[®]

Service Highlights

- ▶ **VistaHD[®]** is a Highly Diverse solution that provisions a business with two always on, always available active paths that connect the business to the Internet via separate complementary physical transport media
- ▶ Cutting edge technology delivered through versatile, customizable solutions to fit your individual needs
- ▶ Instantly meet your technology needs while strategically positioning your business with a "no outage" Internet connection designed for applications of tomorrow - today!
- ▶ A wide array of standard and value added features designed to empower your business
- ▶ Symmetrical speeds and service delivered AT or BEYOND the bandwidth your business requires, not "up to"
- ▶ **VistaHD[®]**, available in most areas, using multiple carrier class technologies designed to deliver service well beyond our competitors' reach or reliability capabilities

Ahead of the Curve

In today's market, flexibility, the ability to quickly adapt, and having the confidence of an always on, reliable, symmetrical Internet connection is critical for success. Our approach to provide you a solution is simple and direct; what do you need and when do you need it? With our privately owned and operated, high capacity IP data network, we can tailor a solution that best matches your specific business needs. Vista's robust business class infrastructure is designed from the ground up utilizing the **VistaHD[®]** architecture throughout our core, easily enabling it to meet the most demanding business applications and services. By popular demand from our customers, we now can extend the **VistaHD[®]** topology beyond our core to offer you the very best in Internet access solutions. **VistaFiber** products, which deliver traditional Ethernet over Fiber Optics, and Vista's extremely versatile **AirFiber**, that boast high performance jet-fast Ethernet over FCC registered microwave frequencies, offers the perfect combination of the two transport media, in one cost effective product: **VistaHD[®]**.

For businesses that do not require larger bandwidth solutions, but rely on rock solid Internet, **AirFiber** paired with **VistaSuperT** (T1) **VistaHD[®]** combinations are also available. As your business grows and demands for newer faster technologies evolve, rest assured that Vista can easily and seamlessly meet those challenges with rapid and powerful scalability delivered right into your business' network. Tap into a network that was designed for the Internet of tomorrow!

Highly Diverse

Vista Broadband Networks proudly shows its pioneering capabilities with an exclusive offering of true **VistaHD[®]** Internet services. This innovative **Highly Diverse** Internet access solution is available only through Vista. Internet outages are not an option, especially for any operation running the demanding applications of today's standard. In order to meet these demands and position your business to drive forward towards success, **VistaHD[®]** products have been engineered, rigorously tested, and proven to deliver the service your business requires. Applications operating over the **VistaHD[®]** service will pass data packets from your business through the best possible, low latency network path. Your business' service with us can be tailored to include a Vista's **AirFiber** (high capacity microwave wireless), **VistaFiber** (Ethernet over Fiber Optic), and/or **VistaSuperT** (copper T-1) to provide your operation with the best possible solution. Utilizing Vista's specifically designed and privately owned and operated business class infrastructure, **VistaHD[®]** solutions keep businesses online at an affordable price. Our **Highly Diverse** Internet access solutions are the perfect choice for critical operations that are required to sustain and maintain full Internet access from potential network outages such as accidental fiber cuts, natural catastrophes, and other unforeseen events.
